

## Wireless notification where you need it

- **Convenient placement, no cords**
- **Eliminates in-room noise**
- **Simultaneously monitors two sensors**

### IQ CordLess Alarm

With convenient placement options in-room or out, the IQ CordLess Alarm allows caregivers to place alarms where they're needed most, keeping noise away from patients.

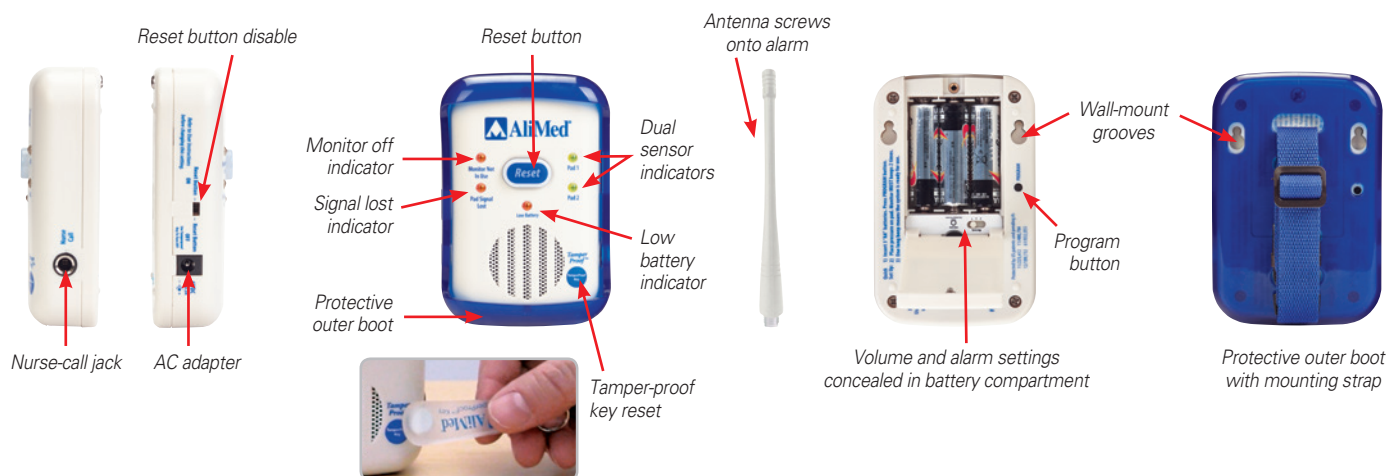

Dual sensor indicators simultaneously monitor and show connectivity of two sensors for added security while CordLess sensors reduce trip hazards and enable use in healthcare settings that prohibit corded alarms, meeting mental health unit requirements.

Once activated, the alarm's protected settings eliminate the need for staff reconfiguration, ensuring the alarm is functioning properly. Continuously adjustable audible and silent options with nurse-call integration reduce the affects of "alarm fatigue."

With easy mounting to any bed or chair, the IQ CordLess Alarm is compatible with all AliMed CordLess Sensors, including CordLess Pressure Sensor Pads for chairs and beds, and CordLess Floor Mats.

To order, see reverse side.

# IQ CordLess Alarm
